Dear To, Whom it May Concern:

It is my pleasure to recommend Kerem GARIP for admission to Computer Science at your university. I am working at KOTON MAĞAZACILIK TEKSTİL SANAYİ VE TİCARET A.Ş. as Software Development Executive for two years.

Kerem applied to our company for his compulsory internship. We planned the compulsory internship to be 3 days a week for 10 weeks.

His internship started on March 15, 2023 and we had a working period that ended on May 26.

After the Human Resources Department deemed it appropriate, he met with me.

I found that he was enthusiastic and open to learning. For this reason, we started the internship after giving the appropriate approval from me.

In general, he is suitable for teamwork and has analytical skills. He is disciplined and adheres to the timings. I saw that he had no difficulty in pouring what he learned in university into practical work. He completed all the tasks assigned to him completely. I observed that he was successful in his business and social relations with Sena, our software developer in charge of his internship.

I can say that Kerem is a good candidate for graduate education in the field of software.

In, long-term graduate education, especially in backend and data security studies

it will be greatly beneficial.

During the short internship period, he has proven to have the perseverance, initiative, and intellectual creativity necessary to complete an advanced postgraduate degree. For this reason, I recommend Kerem GARIP. Your program will be extremely positive for him and thus help him reach the levels he wants.

If I can help you further or give you more information, please feel free to contact me.

Zafer ÇINAR
Software Development Executive
